

Fidelity VIP Freedom Fund 2010 Portfolio - SC

Investment Strategy from investment's prospectus

The investment seeks high total return with a secondary objective of principal preservation.

The fund primarily invests in a combination of underlying Fidelity VIP equity, fixed-income, and short-term funds. It allocates assets with an asset allocation strategy that becomes increasingly conservative until it reaches 40% in short-term funds, 35% in investment-grade fixed-income funds, 20% in domestic equity funds and 5% in high yield fixed-income funds (approximately 10 to 15 years after the year 2010).

Category Description: Target-Date 2000-2014

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2000-2014) for retirement or another goal. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. These portfolios get more conservative as the goal date approaches by investing more in bonds and cash. Investment managers structure these portfolios differently; two funds with the same goal year may have different allocations to equities and therefore different levels of return and risk.

Broad Asset Class: Asset Allocation

Asset Allocation is the apportioning of investment funds among categories of assets such as Domestic Equity, International Equity, Fixed Income and Cash Equivalents.

Notes

This material is authorized for client use only when preceded or accompanied by a Disclosure Statement, a product prospectus (variable annuity and variable life insurance only), a fund prospectus and/or informational brochure containing more complete information. These can be obtained from your investment professional and should be read carefully before investing or sending money.

NOT A DEPOSIT – NOT FDIC INSURED – NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY – NOT GUARANTEED BY THE INSTITUTION – MAY GO DOWN IN VALUE

The Broad Asset Class identifies a fund's investment style. The Broad Asset Class was developed by Nationwide in conjunction with Ibbotson Associates for asset allocation. Asset Allocation does not assure a profit or guarantee against a loss in a declining market.

Risk Classification as of 03-31-08

An investment's risk classification corresponds with the following ranges of standard deviation.

I	II	III	IV	V	VI
I Lowest: Money Market and Stable Value Funds					
II Very Low: 0.00-3.46					
III Low: 3.47-5.21					
IV Moderate: 5.22-9.95					
V High: 9.96-13.50					
VI Very High: 13.51 and above					

Standard Deviation is a statistical measurement of dispersion about an average, which depicts how widely the returns varied over a certain period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

Morningstar provides standard deviation and Nationwide provides the ranges.
