

Dreyfus Stock Index Fund, Inc. - Service Shares

Investment Strategy from investment's prospectus

The investment seeks to match the total return of the Standard & Poor's 500 Composite Stock Price index.

The fund generally invests in all 500 stocks in the S&P 500 index in proportion to their weighting in the index. It attempts to have a correlation between performance and that of the S&P 500 index of at least 95% before expenses. The S&P 500 index is an unmanaged index of 500 common stocks chosen to reflect the industries of the U.S. economy and is often considered a proxy for the stock market in general. The fund also may use stock index futures as a substitute for the sale or purchase of securities.

Category Description: Large Blend

Large-blend funds have portfolios that are fairly representative of the overall stock market in size, growth rates, and price. They tend to invest across the spectrum of U.S. industries and owing to their broad exposure, the funds' returns are often similar to those of the S&P 500 Index.

Broad Asset Class: Large Cap Stocks

Shares of ownership in large corporations.

Notes

This material is authorized for client use only when preceded or accompanied by a Disclosure Statement, a product prospectus (variable annuity and variable life insurance only), a fund prospectus and/or informational brochure containing more complete information. These can be obtained from your investment professional and should be read carefully before investing or sending money.

NOT A DEPOSIT – NOT FDIC INSURED – NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY – NOT GUARANTEED BY THE INSTITUTION – MAY GO DOWN IN VALUE

The Broad Asset Class identifies a fund's investment style. The Broad Asset Class was developed by Nationwide in conjunction with Ibbotson Associates for asset allocation. Asset Allocation does not assure a profit or guarantee against a loss in a declining market.

Risk Classification as of 09-30-08

An investment's risk classification corresponds with the following ranges of standard deviation.

I	II	III	IV	V	VI
---	----	-----	----	---	----

- I Lowest: Money Market and Stable Value Funds
- II Very Low: 0.00-3.46
- III Low: 3.47-5.21
- IV Moderate: 5.22-9.95
- ▶ V High: 9.96-13.50
- VI Very High: 13.51 and above

Standard Deviation is a statistical measurement of dispersion about an average, which depicts how widely the returns varied over a certain period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

Morningstar provides standard deviation and Nationwide provides the ranges.
